

# Passive 6-channel pre-amplifier with master volume and individual channel volume control

Input sockets – typically RCA

## Bill of Materials

Part number	Part description	Part function	Quantity required	Comments
CT2-10k-1/line	10kOhm mono attenuator, fine steps	Fine level adjustment for individual channels	6 pcs	DACT product
CT2-10k-6	10kOhm 8-gang attenuator, normal steps	Master volume control	1 pc.	DACT product
-	Input sockets	Connecting inputs	6 pcs.	Usually RCA type. Individual choice of brand.
-	Output sockets	Connecting outputs	6 pcs.	Usually RCA type. Individual choice of brand.
DC-DIYsig--	DIY signal wire	Wires connecting input sockets to indiv. channel controls	6 pcs. dual or 12 pcs. single	Dual Connect gold signal wires recommended
DC-DIYsig--	DIY signal wire	Wires connecting individual channel controls to line stage inputs	6 pcs. dual or 12 pcs. single	Dual Connect gold signal wires recommended
DC-DIYsig--	DIY signal wire	Wires connecting line stage outputs to output sockets	6 pcs. dual or 12 pcs. single	Dual Connect gold signal wires recommended
CT101	2-channel line stage	Active preamplifier stage, 0-6-12dB gain	3 pcs.	DACT product
CT102	Audio power supplier	Power supply for line stages	1-6 pcs.	One power supply is sufficient but up to 6 can be used for ultimate performance
-	Enclosure
